SUBJECT INDEX

Abrasive mill for pearling cereals and dehusking pulses 220
Acceptability, of fish protein crackers 204
Acceptance testing of novel product 551
African locus bean
  effect of cooking on dehulling 461
  effect of cooking on water uptake 461
Agar-agar gel strength and texture 692
Albacore, canned
  trimethylamine 78
  volatile bases 78
Alginate gel strength and texture 692
Amaranthus viridis, carotenoids and vitamin A 213
Amines, higher, on storage of whole mackerel 82
Amino acids of whole mackerel 82
Amylase, immobilized 1
Anaerobic storage of whole mackerel 82
Anthocyanin hydrolysis and degradation in raspberry 596
Anthocyanins in raspberry juice, effect of enzyme treatments 596
Apple juice pasteurization 583
Apricots, heat of sorption of water in 350
Ascorbic acid in dried cauliflower 47
Ash content, rapid measurement 26
Aspalathus linearis, rooibos tea
  extraction of polyphenols 339
  extracts 344
Asparagus lettuce 558

Bacillus coagulans, heat resistance of spores in tomato paste 442
Batch extraction conditions for rooibos tea 339
Beef, flaked as grillsteaks, processing of 643
Beef discoloration, review 613
Beef processing, decontamination model 88
BET monolayer of extruded rice snacks 360
Beverages, enzymatic treatment 1, 596
Blanching, hot water, of potatoes 61
Boar taint 313
Bottled pawpaw juice, formulation and shelf-life 706
Bramley apple pectinesterase, characteriztion 188
Brassica oleracea var. *botrytis*, dehydration 47
Browning in dried cauliflower 47

Calamus deerratus Becc. for horticultural basket materials 226
Camote water desorption isotherms 140
Cane and palm frond, tensile and compressive strength as packaging 226
Canned lagers, usage context by repertory grid 699

Canning, modelling cooling phase 668
Capillary viscometer 129
CO_2 diffusion coefficient in tomatoes 318
CO_2 diffusion in tomato during modified atmosphere storage 318
CO_2 extraction of ginger, kinetics of 328
Carotene loss as process indicator in extrusion cooking 420
Carotenoid composition, vitamin A in Brazilian leaf vegetables 213
Carrageenan gel strength and texture 692
Carrots, ready-to-use, grated 110
Casein coagulation and washing 377
Casein production from skim milk powder 377
Casein production
  optimization using response surface methodology 377
  process variables 377
  residual whey components 377
Cassava, detoxification 198
Catering, cooking and cooling methods for large meat joints 657
Catering foods, cook–chill systems 247
Catering systems, cook–chill foods 247
Cauliflower, dehydrated, quality 47
Chemical changes in MAP minced meat at 3°C 389
Citrus juice pasteurization 583
Coagulation and washing conditions for acid casein production 377
Cocoa butter extender 711
Cocoa butter substitutes from sal fat 711
Colour change in meat 98
Colour in retail display of beef 613
Colour in retail display of lamb 631, 637
Colour of surimi and kamaboko 281
Colour stability of thawed lamb 631, 637
Comminuted meat slurry, rapid processing analysis 519
Compressive strength of cane and palm frond for baskets 226
Consumer conception of product use of canned lagers 699
Consumer response to akara in USA 551
Consumer response to cowpea paste product in USA 551
Context segmentation of lager for marketing 699
Contextural evaluation of canned lagers by repertory grid 699
Controlled atmosphere storage of grated carrots 110
Controlled pressure cooling in canning 668
Convenience food, consumer testing 551
Cook–chill foods, sensory quality 247
Cooking and cooling methods for large meat joints 657
Cooking loss in flaked beef grillsteaks, effect of salt and polyphosphates 643
Cooling phase of heat sterilization, modelling 668
Cowpea utilization 209
Cowpea varieties, cooking time and quality 209
Crackers, fish protein, acceptability 204
Crispness of rice–legume extruded snacks 360
Cyanide in cassava 198

Decontamination cabinet for beef 88
Decontamination of beef sides 88
Dehulling locust beans 461
Dehusking of pulses 220
Depolymerization of polysaccharides 1
Desorption isotherms of maize hulls 435
Desorption isotherms of shelled maize 435
DFD beef, changes in metabolites at 3°C 389
Dhal, low-cost dehuller 458
Dielectric properties of fish 26
Dielectric properties of herring flesh 26
Diene conjugation in dried–salted sardines 295
Differential strain index of gels 692
Diffusion modelling in tomato 318
Discoloration of beef meat, review 613
Disulphide reduction, in kamaboko 260
Dried cauliflower
  pretreatment 47
  stability 47
Dried fruits, heat of sorption of water in 350
Dried salt fish, sensory quality 409
Droplet size of emulsions 39
Drying conditions for brined yellowtail 409
DSC of flaked meat 643

Effective diffusivities of CO_2 in skin flesh and stem scar 318
Elaeis guineensis Jacq. for horticultural basket material 226
Electrical conductivity of foods 9
Electrolyte leakage in grated carrots 110
ELISA, nisin assay 590
EMC of extruded rice snacks 360
Emulsification, small-scale, reproducible 39
Emulsions, fine, small scale 39
Enzymatic depolymerization 1
Enzyme activity *in situ* in apple 188
Enzyme treatment of beverages 1, 596
Enzymes, immobilized 1
ESR detection of irradiated chicken 512
ESR detection of irradiated meat, interlaboratory trial 682
Evaluation of thermal processing 420
Extruded rice–legume snacks, EMC, BET monolayer and crispness 360
Extrusion cooking, carotene loss as process indicator 420
Extrusion cooking of wheat dough 129

Fat analysis, degree of unsaturation by ^{13}C NMR 399
Fat content, rapid measurement of 26
Fat cooling curves to assess process treatment 711
Fat fractionation for cocoa butter extender 711
Fatty acid and aldehyde changes in meat after heating 304

Fatty acid loss in dried–salted mackerel 66
Fibre-optic spectrophotometric analysis of meat slurry 519
Figs, heat of sorption of water in 350
Firmness of stem vegetables, precooking effect 558
Fish mince, for surimi and kamaboko 281
Fish protein hydrolysate, acceptability in crackers 204
Fish-meal, from mackerel 82
Flaked beef grill steaks, processing conditions 643
Flaked meat, factors influencing particle size 483
Flavonoids in rooibos tea 344
Flavanols in rooibos tea 344
Fluorescent oxidation products in dried mackerel 66
Fluorescent products in dried–salted sardines 295
Food component configuration in microwave reheating of frozen meals 538
Food microbiology, water activity of culture media 464
Food preservation using nisin, assay method 590
Food safety, microwave reheating 538
Foods, ohmic heating 9
Freeze-dried rooibos tea 344
Freezing point depression of flaked beef 643
Frozen lamb, colour stability on thawing 637
Frozen meals, microwave reheating 538
Fruit juice processing, portable low-cost equipment 583
Fruit juice clarification 1
Fruit preservation of pineapple 576
Fruits, dried, heat of sorption of water in 350

Gamma irradiation of chicken bones, detection of 506
Gari, detoxification 198
Gas storage of tomatoes 318
Gel strength estimated from force deformation data 692
Gel texture in sardine kamaboko 260
Gelatin substitutes 527
Gelatinization of starch in potato on blanching 601
Gelation of sardine proteins, additives and thermal processing 260
Gels, transparent, from pea protein 527
Ginger oleoresin 157
Ginger rhizome extraction, partition constants 566
Ginger rhizome, kinetics of supercritical CO_2 extraction 328
Ginger solvent extraction kinetics 157
[6]-Gingerol from ginger 328
[6]-Gingerol, partition constants for solvent and CO_2 extraction 566
Glucose diffusion coefficient in blanching potatoes 722
Glycosidase activity in pectolytic enzymes 596

Hard-to-cook attributes in cowpea 209
Hardness by mouth and touch predicted from differential strain index 692
Heat of sorption of water in dried fruit 350
Heat processing of solid foods 9

Heat transfer coefficients for modelling cooling after heat sterilization 668
Heat transfer in solid foods 9
Herbal tea, rooibos 339
Homogenizer
  high pressure, small scale 39
  jet 39
Horticultural baskets, materials from 226
Hot water decontamination of beef sides 88
HTST sterilization of solid food 9
Hydrocolloid gel strength from force deformation data 692

Ice crystal size and lipid oxidation 718
Image analysis as measure of rigor in fish 477
Image analysis of particle size of meat 483
Immersion cooking/cooling for large meat joints 657
Immobilized amylase 1
Immobilized enzymes 1
Immobilized pectinase 1
Immunoassay for nisin 590
Indole, analysis in poricine gut contents 313
Initial freezing point of flaked beef, effect of salt and polyphosphate 643
Internal reflectance of meat slurry as loss predictor 519
Irradiated chicken
  detection of
    interlaboratory trial 512
    method comparison 512
  effect of site of bone on ESR signal 506
  storage effects on ESR signal 506
Irradiated dose estimation using ESR 682
Irradiated meat, detection of
  comparison of sample preparation 682
  interlaboratory trial 682
Iru production 461
Isomerization of carotene in extrusion cooking 420
Isosteric heat of desorption of maize 435

Kamaboko gels, British fish, properties of 281
Kamaboko gels from sardine
  protein solubility 260
  texture 260
Keropok crackers 204
Kumara water desorption isotherms 140

Lactic acid bacteria in carrots 110
Lactic fermentation in cassava 198
Lamb chop colour after long frozen storage 637
Lamb chop colour after short frozen storage 631
Legumin in transparent gels 527
Lepidium pseudodidymum, carotenoids and vitamin A 213

Lethality calculation for thermal processes 148
Leuconostoc mesenteroïdes 110
Linamarin fermentation in cassava 198
Lipid oxidation and rancidity of dried–salted sardines 295
Lipid oxidation in dried mackerel 66
Lipid oxidation in frozen fish and chicken meat 718
Lipid oxidation in frozen meat, effect of freezing rate 718
Lipids of meat, changes in fatty acids and aldehydes after heating 304

Mackerel, dried–salted 66
Maize
  BET equation 435
  desorption isotherms 435
  isosteric heat of desorption 435
  sorption dynamics 435
Manihot esculenta Crantz, detoxification of 198
Mass diffusivity of sugars in potato 61
Mass transfer during osmotic dehydration of pineapple 576
Meat comminution
  factors influencing particle size 483
  pre-breaking effect 483
  temperature effect 483
Meat joints, large, cooking and cooling methods 657
Meat phospholipids, changes after heating 304
Meat slurry
  analysis of internal reflectance 519
  control of continuous processing 519
  prediction of lipid content and cooking loss 519
  prediction of processing loss 519
Microbial changes in MAP minced meat at 3°C 389
Microbial counts on large meat joints 657
Microbial spoilage of carrots 110
Microbial spoilage on meat 98
Milling
  bengal gram 220
  green gram 220
  maize 220
  pearl millet 220
  pigeon pea 220
  small-scale processor use 220
  sorghum 220
Minced meats, modified atmosphere packing
  chemical changes 389
  microbial changes 389
Modelling of thermal processing 420
Modelling water loss in osmotic dehydration of pineapple 576
Modified atmosphere packaging of meats 98
Modified atmosphere packing of minced meat 389
Modified atmosphere storage of grated carrots 110

Modified atmosphere storage of tomatoes 318
Mustard stem, precooking and hardness 558
Myoglobin autoxidation and beef discoloration 613

Net protein utilization in dried mackerel 66
Nisin, enzyme immunoassay 590
NMR, ^{13}C, high resolution for fat analysis 399
Non-enzymic browning in dried–salted sardine 295
Non-enzymic browning in mackerel 66
Nutritional quality of dried–salted mackerel 66

Off-odours in meat 98
Ohmic heating of foods 9
Osmotic dehydration of pineapple rings 576
Oxidative changes, in cook–chill foods 247

Package factors in beef discoloration 613
Packaging, effect on microwave reheating of frozen meals 538
Partition constants for [6]-gingerol in ginger extraction 566
Pawpaw, bottled
  formulation and shelf-life 706
  stabilization, storage 706
Pea protein fractionation 527
Pea protein transparent gels, isolation methods 527
Pearling cereals 220
Pectic substances, depolymerization 1
Pectic substances and firmness of stem vegetables 558
Pectinase, immobilized 1
Pectinesterase
  activation energy 188
  activity *in situ* in apple 188
  enzyme stability 188
  in apple juice production 188
  optimization of activity 188
Pectinesterase activity on cooking stem vegetables 558
Peeling ease in tomatoes, influence of anatomy 449
Pericarp, outer, variations affecting ease of peeling 449
Permittivity of herring flesh 26
pH activity of serine proteinases 180
Phospholipids of meat, changes after heating 304
Pineapple, mass transfer in osmotic dehydration 576
Polyene index in dried–salted sardines 295
Polyphenol extraction from rooibos tea 339
Polyphenols in rooibos tea 344
Polysaccharide degradation 1
Portulaca oleracea, carotenoids and vitamin A 213
Potato-starch gelatinization temperature *in situ* 601

Potatoes
  hot water blanching, sugar loss 61
  nutrient loss on blanching 61
Precooking, effect on firmness, pectic substances of stem vegetables 558
Preservatives for bottled pawpaw juice 706
Pressure cooking/vacuum cooling for large meat joints 657
Proanthocyanidins in rooibos tea 344
Process control of cooling phase in canning 668
Process factors in beef discoloration 613
Processing times and losses for cooking large meat joints 657
Protein, sardine, heat processing for kamaboko 260
Protein–protein interaction, in kamaboko 260
Protein supplementation, rice–legume snacks 360
Prunes, heat of sorption of water in 350

Quality changes in dried mackerel 66
Quantitative triglyceride isomer analysis 399

Rancidity and lipid oxidation of dried–salted sardines 295
Rapid measurement of fat, water, ash 26
Raspberry juice anthocyanins, pectolytic enzyme treatments 596
Rastrelliger kanagurta, dried, salted 66
Ready-to-use grated carrot 110
Reducing sugars, loss on blanching potatoes 61
Rehydration activity of dried cauliflower 47
Rendered animal fats, isomer and unsaturation analysis 399
Repertory grid method to evaluate consumer context of canned lagers 699
Retail display of red meats 98
Rheology of gels 692
Rheology of wheat flour dough 129
Rice–legume extruded snacks, crispness 360
Rigor in rainbow trout
  effect of slaughter method 477
  measurement method 477
Rooibos tea
  batch extraction of polyphenols 339
  chemical analysis of extracts 344
  sensory analysis of extracts 344
Rural technology, soya processing 458

Sal (*Shorea robusta*) fat as cocoa butter substitutes 711
Salt pretreatment of dried cauliflower 47
Sardine proteins, mechanism of gelation 260
Sardines, dried–salted, rancidity and lipid oxidation in 295
Scombrotoxins 82
Sensory quality of cook–chill foods 247
Sensory rancidity in sardines 295
Serine proteinases of *Brevibacterium linens* 180
Skatole, analysis in porcine gut contents 313

Skim milk powder, production of acid casein 377
Slaughter method, effect on rigor in rainbow trout 477
Small-scale fruit juice processing 583
Solvent extraction of ginger, kinetics 157
Sonchus oleraceus, carotenoids and vitamin A 213
Sorbic acid–thiol reaction kinetics 230
Sorbic acid–thiol reaction
  catalysis by surfactants 168
  kinetics 168
Sorption isotherms of dried cauliflower 47
Sous-vide processing 247
Soya processing, rural technology 458
Soybean dehuller, low-cost, manual 458
Specific energy of wheat flour dough 129
Spray-dried rooibos tea 344
Sprouting broccoli, hardness in 558
Starch, depolymerization 1
Starch gelatinization temperatures in potato during blanching 601
Stem vegetables, effect of precooking on firmness, pectic substances 558
Storage of intact trout 477
Storage of whole mackerel 82
Sucrose pretreatment of dried cauliflower 47
Sugar retention in grated carrots 110
Sultana raisins, heat of sorption of water in 350
Supercritical CO_2 extraction and equilibration properties of ginger 566
Supercritical CO_2 extraction of [6]-gingerol from ginger 328
Surfactant reaction of sorbic acid–thiol reactions 168
Surimi, from British fish, properties of 281

Tannins in rooibos tea 344
TBA assay in MAP red meats 98
TBA reactive substances in dried–salted sardines 295
TBA values in cook–chill foods 247
TBA values in dried mackerel 66
TBA values on stored frozen meat 718
Temperature stability of serine proteinases 180
Tensile strength of cane and palm frond for baskets 226
Texture of gels predicted from force deformation data 692
Texture of kamaboko gels from British fish 281
Texture of sardine kamaboko gel 260
Texture of stem vegetables, effect of precooking 558
Thermal treatment of tomato paste 442
Tomato paste
  aseptic processing 442
  thermal treatment 442
Tomato, CO_2 diffusion in, during modified atmosphere storage 318
Tomatoes, influence of anatomy on ease of peeling 449
Total sugars, loss on blanching potatoes 61
Transmission time domain spectroscopy 26

Triglycerside isomer analysis by ^{13}C NMR 399
Trimethylamine in canned albacore 78
Trimethylamine oxide in canned albacore 78
Tropical storage of bottled pawpaw juice 706
Tuna, thermal processing 78

Unsaturated fat analysis 399

Vacuum packaging of cook–chill foods 247
Vacuum skin packaging of beef 98
Vicilin in transparent gels 527
Vigna unguiculata (L.) Walp, cooking time and quality 209
Viscosity of wheat dough 129
Visual assessment and colour measured in lamb 631
Vitamin A, in Brazilian leaf vegetables 213
Volatile bases in canned albacore 78

Waste fish utilization 281
Water activity of dried cauliflower 47
Water activity measurement in microbiological culture media 464
Water content, rapid measurement 26
Water desorption isotherms of sweet potato 140
Wheat flour extrusion cooking 420
Whey components in acid casein production 377

Xanthosoma ssp., carotenoids and vitamin A 213

Yellowtail
  brined, dried, water activity and sensory properties 409
  brined, drying conditions 409
  brining conditions 409

BOOK REVIEW INDEX

A Colour Atlas of Meat Inspection 608
Biology of Food Irradiation 473
Biotechnology Applications in Beverage Production 471
Biscuits, Cookies and Crackers, vol. 1 120
Biscuits, Cookies and Crackers, vol. 2 234
Chemical Changes During Food Processing, vol. 21 610
Chemical Senses, vol. 1 369
Chitin and Chitosan—Sources, Chemistry, Biochemistry, Physical Properties and Applications 368
Cypermethrin: The WHO Environmental Health Criteria Series No. 82 244
DDT and its Derivatives: The WHO Environmental Health Criteria Series No. 83 244
Developments in Food Preservation, vol. 5 242
2,4-Dichlorophenoxyacetic Acid (2,4-D): The WHO Environmental Health Criteria Series No. 84 244
Dichlorvos: The WHO Environmental Health Criteria Series No. 79 244
Dictionary of Food and Nutrition 365
Dietary Starches and Sugar in Man: A Comparison 474
Economics of Food Processing in the United States 233
Essential Food Hygiene 243
Evaluation of Certain Food Additives and Contaminants. World Health Organization Technical Report Series 776 244
Fermentation Process Development of Industrial Organisms 469
Fluorescence Analysis in Foods 475
Food Biotechnology 123
Food Colloids 603
Food Emulsifiers: Chemistry, Technology, Functional Properties 469
Food Science, Nutrition and Health, 5th edn 121
Food Toxicology. A Perspective on the Relative Risks 367
Food: The Chemistry of its Components 121
Handbook of Sugar Separations in Foods by HPLC 124
Immunoassays for Veterinary and Food Analysis, vol. 1 364
International Food Regulation Handbook—Policy, Science and Law 241
Lead: The WHO Environmental Health Criteria Series No. 85 244
Lost Crops of the Incas 607
Meat Freezing: A Source Book 126
Mechanisms of Action of Food Preservation Procedures 470
Membrane Applications and Research in Food Processing 606
Mercury: The WHO Environmental Health Criteria Series No. 86 244
Micronutrients in Milk and Milk Based Food Products 239
Neural Mechanisms in Taste 475
Plenty and Want 233
Polysaccharides, Syntheses, Modifications and Structure/Property Relations 122
Postharvest: An Introduction to the Physiology and Handling of Fruit and Vegetables 238
Principles and Practice of Chromatography 236
Principles of Food Preservation 611
Process Engineering in the Food Industry: Developments and Opportunities 235

Quality Factors of Fruits and Vegetables 602
Rancidity in Foods, 2nd edn 375
Rapid Assessment of Community Nutrition Problems–A Case Study of Parbhani, India 371
Safety of Irradiated Foods 375
The Chemistry and Technology of Edible Oils and Fats and their High Fat Products 370
The Human Food Chain 125
The Science and Technology of Whiskies 374
Vegetable Breeding, vols. 1–3 366
Water and Food Quality 372
Wheat: Chemistry and Technology, vols. 1 and 2 236
Yeast: Biotechnology and Biocatalysis, vol. 5 605

REFEREES

The editors thank all the following for their help over the last year; we apologize if anyone has been inadvertently missed.
